

# **C++ Comments**

Instructor: Andy Abreu

# Comments

- Comments in our C++ source code can serve many purposes
  - 1. Explains to the reader (another programmer) what this program does.
  - 2. Note to other developers on what the block of code is doing.
  - 3. A To Do list on tasks you need to complete.

# Styles of Comments

- In line comments, marks rest of the text in the line as comments

//this is a in line comment

- Multi-line comments, marks a block of text as comments

/\*

This is a  
multi-line  
comments
