FUN IN PROGRAMMING

CUNY Queens College
CS111 Lab Instructor: Chi Tse (Ricky)
AGENDA:

- Enjoy the fun in programming
- Online Practices
- Coding Competitions
- Hackathons/Programming Challenges
Games for Programmers
Solve Puzzles - Improve your Skills - Share
Solve programming challenges
Ask and answer questions
Study algorithms for coding interviews

A New Coding Interview Question Every Week

Zhejiang University Online Judge
Welcome to the Timus Online Judge, problem archive with online judge system

The online contest finishes in: 3 h 30 min

Timus Online Judge is the largest Russian archive of programming problems with automatic judging system. Problems are mostly collected from contests held at the Ural Federal University, Ural Championships, Ural ACM ICPC Subregional Contests, and Petrozavodsk Training Camps. To start solving problems, visit the guide.

Timus Online Judge provides you an opportunity to participate in online versions of many contests held at the Ural Federal University on a regular basis. See the rules of online contests.

This site is created and administrated by the students and graduates of the Ural Federal University.

About Project Euler

What is Project Euler?

Project Euler is a series of challenging mathematical/computer programming problems that will require more than just mathematical insights to solve. Although mathematics will help you arrive at elegant and efficient methods, the use of a computer and programming skills will be required to solve most problems.

The motivation for starting Project Euler, and its continuation, is to provide a platform for the inquiring mind to delve into unfamiliar areas and learn new concepts in a fun and recreational context.

Who are the problems aimed at?

The intended audience include students for whom the basic curriculum is not feeding their hunger to learn, adults whose background was not primarily mathematics but had an interest in things mathematical, and professionals who want to keep their problem solving and mathematics on the cutting edge.

Can anyone solve the problems?

The problems range in difficulty and for many the experience is inductive chain learning. That is, by solving one problem it will expose you to a new concept that allows you to undertake a previously inaccessible problem. So the determined participant will slowly but surely work his/her way through every problem.
ONLINE PRACTICES

Master any CS Domain

With more than five domains to choose from, you can decide if you want to improve your coding skills on Artificial Intelligence or Machine Learning. Whether you are a beginner or an industry veteran, you will find several contests that challenge you and help you boost your coding chops. Think you’ve mastered a domain? Great. Go ahead and practice to excel in another domain.

Artificial Intelligence

Algorithms

Functional Programming

Code Golf

Machine Learning

What is CodeProject?

CodeProject is a community of Software development and Design developers joined together with certain common goals: to learn, to teach and to have fun programming. Developers from all over the world come together to share source code, tutorials and knowledge for free to help their fellow programmers.
CODING COMPETITIONS

This is the place to show off your skills

Try your hand at one of the competitions; solve a problem and write great code. Put yourself up for recognition and win great prizes.

Contests begin on the first of every month.

About

What is Code Jam?

Code Jam calls on programmers around the world to put their skills to the test by solving multiple rounds of algorithmic puzzles. The online rounds conclude in the World Finals, which rotates globally. In addition to being challenging and fun, Code Jam problems can help you develop your coding and programming skills. If you've never tried Code Jam, what are you waiting for? If you're a returning participant, welcome back, and thanks for stopping by.

To learn more about other Google coding competitions, visit:

- **Kickstart** for university students or industry professionals looking to develop their coding skills and potentially pursue a Google career.
- **Hash Code** for students in Africa, Europe, and the Middle East looking to work as a team on real Google problems.
## Hackathons/Coding Challenges

Participate in online and in-person hackathons.

What is Microsoft Imagine?

Microsoft Imagine connects students with the tools, resources and experiences they need to elevate their skills for today’s working world. Whether it’s building a game, designing an app or launching a project, Microsoft Imagine helps students develop their ideas and boldly bring them to life.

Competitions

Technology competitions for all levels and interests ranging from short skill building challenges to in-depth competitions where students create games, apps and integrative solutions.

Developer Tools

Professional level developer tools and software for students at no cost - everything needed to create games, apps and websites.

Online Learning

Free online training and courses to help students learn the latest technology and take their coding skills to the next level.
