```cpp
#include<iostream>
using namespace std;

int main() {
    int length, width;
    cout << "please input length of rectangle: ";
    cin >> length;
    cout << "please input width of rectangle: ";
    cin >> width;
    cout << "the area of the rectangle is " << length * width << endl;
    return 0;
}
```
